PALE BEAR CROCKERS are spreading close to roads throughout the Peace River country now, and are numbered among the certain heralds of spring. They're the first northern wildfowl to appear annually. Hundreds of these duck marry city and district homes currently. —Staff photo.

HINTS FOR PICNIC
Keep your picnic foods cool for several hours by freezing unopened cans of tomato, pea or fruit juices in freezing compartments of mechanical refrigerator. Wrap frozen cans in waxed paper or plastic to keep moisture, steam, condensation on cold cans, from wetting food packed around them. Arrange chilled perishable foods, sandwiches, cold fried chicken, hard-boiled eggs, etc., around cans in food hamper, basket or canteen. Use several layers of newspapers to insulate a canteen or open basket. Be sure to cover with paper too if no lid is available. Juice will take, usually, three to four hours to thaw and then may be used as a refreshingly cool beverage.

DRIVE WITH CARE—THE LEFT SIDE MAY BE YOUR OWN

LIGHTWEIGHT ACTION—L. Col. Tommy Channon, 1 lb. 10 oz., lands a straight right during his title bout with L. Col. Leo Moritz, 1 lb. 10 oz., in one of the most popular bouts of the meet. Channon, last year's Army and Dominion lightweight champion, needed all his experience to slay off Moritz, who started like a champion before winning under a strong body attack. Moritz, in his 43 wins had scored 28 KO's. Channon's record now stands at seven losses in 113 bouts. —National Defence photo.

ARMY WELTER CHAMPION—Pvt. Earl St. Louis, 27, of Montreal, receives his trophy from Maj.-Gen. J. M. Macdonald after winning the welter open class title in the Army Boxing Club at Winnipeg. St. Louis is a member of the 2nd Battalion, The Royal Canadian Regiment who won his title in the meet and has a record of 41 wins to 44 losses. He competes in the Dominion (Pan American Games Trials) Championship in Maple Leaf Gardens, Toronto. —National Defence photo.

Fall hunting success being determined now

The number of ducks that hunters will shoot next fall is being determined in a large extent right now in the various hunting areas throughout Manitoba and the rest of Canada.

Before hunting regulations are set, game management officials in Manitoba, other parts of Canada and in the United States, want to know just what the hatch was like. The success of the hatch can be far more significant than the number of birds returning to nest in the spring.

This information is being obtained now by an international co-operative waterfowl survey. Jim Gurney, Game warden of southern and central provinces, said that biologists from the provincial game branch are working in co-

junction with experts from other Canadian provinces and from the United States in gathering the information which is vital for the proper management of waterfowl.

The survey will be conducted in three parts: (1) aerial survey; (2) ground studies and (3) banding program.

The banding program, which has taken priority this year in the survey, will include work in these categories: (1) banding in areas south of the prairie; (2) banding of nesting females; (3) banding of diving ducks "locally" and (4) banding of free-flying birds to determine mortality and shooting vulnerability.

The survey is a follow-through of the winter survey conducted in the United States during ground. The spring survey in Canada will show the distribution of nesting waterfowl, nesting conditions and water supply. The summer survey will indicate the success of the breeding season.

The objectives of the surveys in Canada are:

1. To supply regulatory committees in Canada and the United States with forecasts of production and expected fall flights of waterfowl.
2. To obtain basic biological and ecological information through intensive ground studies to provide a better understanding of the mechanism of producing waterfowl.
3. To have representative samples of waterfowl to obtain information on distribution, hunting pressure and mortality rates.

Figure-compliments PRINTED PATTERN

Patterned for larger figures with slumping and ample lines. Use this small slumping pattern or accepted neck for 1941 "round" neck. Use very easy, 3 sleeve version.

Printed Patterns 4204. Women's Size 36, 38, 40, 42, 44, 46, 48, 50. Size 36 takes 4 1/2 yards 38-inch. Printed directions on each pattern part. Easy, accurate.

Send Forty (40¢) in coins (cheques cannot be accepted) for this pattern. Please print plainly this pattern. Name, Address, Style Number.

Miss Adams Pattern Dept. Department P.E.L. 60 Front Street, W. Toronto.

Women Invade Police Precincts

Most of the larger Canadian cities today employ women on their police force and the practice is steadily finding favour among many of the smaller cities. Women, in addition to performing most of the duties regularly carried out by policemen, are preferred for certain types of duty where young girls and women are involved. Above, Constable Eitel explains to class at the Robert Laird School the importance of knowing and obeying traffic safety rules.

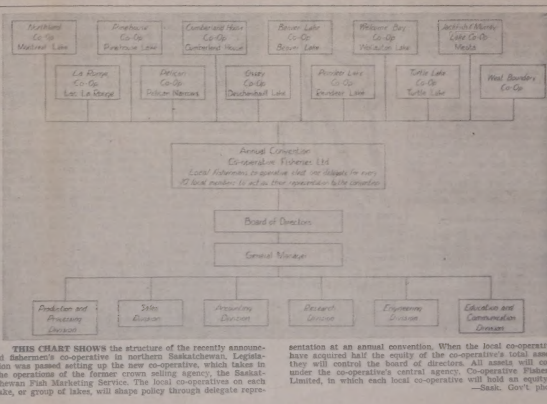

Women receive the same training at the Hamilton Police Academy as the men. Courses include training in the art of judo, photography, fingerprint identification.

Among the growing number of women in Canada who are attracted to police work as a career, Miss Dolores Eitel of Hamilton, is one of 3 young women recently added to this thriving southern Ontario city's police force.

Identification Officer, Herb Mills, points out distinguishing facial characteristics on portrait made up by the Royal Canadian Mounted Police. Miss Eitel, an adept and eager pupil, placed 2nd at the end of her training course, in a class of 21 rookie cops — 22 of which were men.

attack by meaty-mouthed leftists and middle-headed liberals. Mr. Dulles understood the Soviet menace. He was not one of those who believed that Khrushchev, the man responsible for the brutal massacres in Hungary following the popular uprising against communist totalitarianism, was the sort of man who could be won over by the diplomacy of sweetness and light.

Mr. Dulles will long be a figure of controversy in the realm of international politics, but he will never be called an appeaser. His place among the great of the free world is assured.

Local & District

Don't forget the Cemetery Tea in Delia Legion Hall on Saturday, June 13th, commencing at 3 o'clock.

Mr. and Mrs. Bob Milne left Calgary by plane on the 30th of last month for a three month 'visit in Scotland'.

Rev. C. E. Rawson, pastor of the Church of the Nazarene at Craigville and Youngstown was a visitor in Delia Tuesday afternoon.

Reported to be patients in Hanna and Drumheller hospitals are Messrs. Harry Nelson, S. H. Martin, Bill Reeves, Alex. Bolduc, Pete Caravaggio.

There will be a Progressive Conservative meeting held in Delia Legion Hall tomorrow night (Friday), June 12th, at 8 p.m. Messrs. J. H. Horner and Wm. Newman will be the speakers.

Variable weather occurred during the past week, with a liberal shower on the afternoon of Sunday. Overcast skies Tuesday brought a drizzling rain, with temperature in Wednesday, rain fell more or less copiously all forenoon, and the unsettled weather is continuing before going to sleep. The mercury reads 60° above zero.

LATE-JOHN FOSTER DULLES

Death of former U.S. Secretary of State John Foster Dulles is a loss to entire free world. Brand of diplomacy practised by Mr. Dulles was brilliant, forthright and telling. Diplomacy, for him, was not a mere exercise in language but rather the stating of plain truth in language that could not be misunderstood or misinterpreted even in the Kremlin.

Many tributes have been paid to the late Mr. Dulles by those who violently disagreed with him as well as by his friends. Greatest tribute of all, however, lies in fact that during his years in office as a member of the Eisenhower Administration he was hark and feared by the Russian leaders and under constant

ONION MAGGOTS

With increased commercial production of onions in Alberta, pests of this crop can be expected to increase, too. One of the most prevalent is the onion maggot. As far as is known, this insect causes little damage to the onion plant, but it attacks the onion bulbs, and the roots of both cabbage and cauliflower. Baited with insecticides will control most types of maggots.

If introduced seed was sown, they can still be controlled by chemical treatment of the seedlings, transplants and seed in the case of onion. An insecticide containing 1 per cent chlorpyrifos, 2½ per cent aldrin or 2½ per cent heptachlor, can be applied as dust to the base of the plants. Sprays are less effective. In the case of early planting the first application should be made when the first eggs are laid which is usually about the end of May. Two ap-

plications should be administered at intervals of a week to ten days. Current listings of the first of these are extremely important. The rate of application per acre is 30 to 50 pounds of dust per application (1 to 2 pounds per 100 feet of row).

In case of late plantings apply the first application as soon as the eggs can be seen. When treating transplants apply as much as possible. Second and third treatments should follow at intervals of a week or ten days.

A useful leaflet describing this pest and containing information on damage, life history and control, can be obtained from the Canada Department of Agriculture, Ottawa. Ask for publication 2255, "The Onion Maggot."

Commissioners are not paid on arrangements from, but on sales made.

From 1951 to 1957 the average family income in Canada advanced from \$3,555 to \$4,644.

VOTE FOR:

● Homes For the Aged

The five year program calls for fifty modern homes, built and paid for by the Province, to accommodate 4100 senior citizens.

● Local Community Improvements

Improvements in some 200 major towns, villages and hamlets to include street paving, and recreational facilities such as parks, swimming pools, picnic and camp sites and other similar projects.

● A New Provincial Hospital

A Diagnostic and Treatment centre patterned after the Mayo Clinic, and a Province wide program of chronic hospitalization and out-patient services.

● Extended Program for Care and Treatment of Children

A centre for the care and treatment of emotionally disturbed children and a school for the training of cerebral palsy and other physically handicapped children.

● An Expanded Highway Program

A vastly expanded bridge and highway program geared to the anticipated needs of each community and the Province as a whole.

● A 350 Million Dollar Program for Education

This will include a scholarship fund large enough to ensure that no deserving student in Alberta, will through lack of money, be deprived of an opportunity to obtain a University education.
